📍 Ogun state, Nigeria

SUMMARY

Enthusiastic Junior Software Developer with solid experience and proficient in JS, HTML, and CSS. Experienced in supporting senior developers and implementing new solutions. Excellent communication and analytical skills. Proud of successfully completing a complex project involving UI/UX concepts and web technologies. Seeking to join a global powerhouse business to further develop my skills and contribute to their growth. Open to learning new technologies.

STRENGTHS

Problem-Solving

I possess exceptional skills in analyzing intricate problems, identifying underlying causes, and formulating innovative solutions. Demonstrated ability to effectively resolve software defects, resulting in improved system stability.

Collaboration

Adept at collaborating with cross-functional teams to achieve project goals. Recognized for outstanding teamwork and collaboration skills.

EXPERIENCE

Software Developer

Education Platform Development | Maverick Team(TIIDE Lab)

📅 2023 - 2023 📍 Nigeria

Collaborated on developing a functional educational platform using JS, HTML, and CSS. Implemented key features, including authentication, course management, and interactive learning modules.

- Collaborated with a team of developers to design and develop a functional educational platform.
- Utilized technologies such as JavaScript, HTML, and CSS to build the platform.
- Actively participated in code reviews, troubleshooting, and performance optimization to ensure a smooth user experience.
- Demonstrated excellent communication and analytical skills in coordinating tasks and providing regular project updates.
- Successfully deployed the educational platform on Vercel, providing the employer with the link for viewing: [Edu-Mav-Dev-Caleb](#).

Web Developer

Portfolio Website Development

📅 2023 - 2023 📍 Nigeria

Developed a visually appealing and responsive portfolio website using HTML, CSS, and JavaScript. Implemented modern design principles, interactive elements, and animations for an engaging user experience. Optimized performance and integrated external APIs, such as GitHub, to showcase real-time data and projects.

- Independently conceptualized, designed, and developed a personal portfolio website from start to finish.
- Utilized HTML, CSS, and JavaScript to create a visually appealing and responsive website.
- Implemented modern design principles and best practices to ensure an engaging user experience.
- Integrated external APIs, such as GitHub API, to display real-time data and projects from the GitHub repository.
- Published the portfolio website on GitHub, showcasing the code repository: [GitHub Repository](#).
